(54) DRIVING GAME DEVICE AND ITS BACKGROUND PICTURE DISPLAY METHOD

(57) Abstract:

PURPOSE: To enhance presence with a driving game device which indicates a traveling state by scroll displaying a background picture on a display device and its background picture display method.

CONSTITUTION: This driving game device displays a moving body 44 traveling in a course 42 displayed on a display screen 41 together with the background picture 45 including the course 42 according to the signals from an input device 43 on this display screen 41. The game device includes a detecting means 46 which detects the traveling speed of the moving body 44 according to the signals from the input device 43 and a displacement display means 47 which displays the background picture 45 within the prescribed range with

respect to an ordinary display position by displaying this background picture in directions varying momentarily with time when the traveling speed of the moving body 44 is attained in the prescribed value above.
